

## **SE 4376, Object-Oriented Design Homework #2, OO Paradigm Shift**

Write a 1-2 page summary of R.G. Fichman and C.F. Kemerer, “Object-Oriented and Conventional Analysis and Design Methodologies: Comparison and Critique,” *IEEE Computer*, October 1992. The paper is available through eLearning, in the References folder.

Identify two or three key points made by the authors in your summary.

12-point font, double-spaced, Word document (or pdf).

### Grading Rubric

Less than half-a-page, -50 points

More than 2 pages, -20 points per page

At least two clearly stated points, 25 points each

Proper cites and references

- Citation not made in body of paper, -5 points each
- Citation not in references section, -5 points each
- Reference not adequately described to enable the reader to find, -5 points each

Templates for proper references:

- J. Smith, “Paper Title,” Journal Name, Month, Year, pages.
- J. Doe, “Conference Paper Title,” Conference Name, City, Month, Year, pages.
- E. Roe and A. Doe, *Book Title*, Publisher, Year.
- “Website Title,” <URL: <http://xxx.com>>

Note that URLs are not sufficient citations, unless it’s a web page (and thus not the most credible source material).

Missing the class, assignment, or your name at the beginning of your submission or in the filename, -5 points each
